

VeggieMan Directions

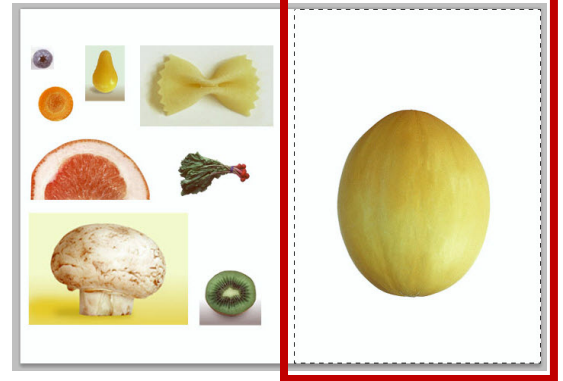

Download the Photoshop file called **VeggieManStart.psd** from the online classroom into your folder. **Do NOT rename** this file! You will be creating a new file that will be saved.

Getting Started

Double click the file you just downloaded, **VeggieManStart.psd** file in your folder. You will be working with two windows for this assignment.

1. Use the **Rectangular Marquee Tool**  and draw a box around the large melon. **Be sure to include ALL the white space around it so you will have room for his hat and ears and bowtie.**
2. **CTRL + C to Copy.**
3. **File > New** or **CTRL + N** This will create a NEW file.
4. **Hit Enter**
5. **CTRL + V** to paste.
6. In the **Layers** Panel, **Double** click on the word **Layer 1** and change the name to **melon.**
7. Save this file as **LastName_VeggieMan.psd**

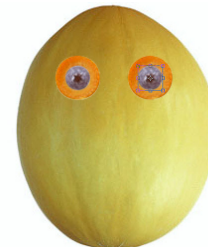

The Carrot Eyes

1. Switch back to the **VeggieManStart.psd** image. 
2. **Zoom** in on the carrot.
3. Select the **Elliptical Marquee tool**.
4. Place your cursor in the center of the carrot.
5. **Hold the ALT Key** down to draw a circle from the inside out and **Hold the Shift Key** down to draw a **perfect circle** around the carrot. (fig. 2)
6. **Copy (CTRL + C)** the circle and
7. Go to the New document (LastName_VeggieMan.psd) and paste (**CTRL + V**) it on the melon OR Use the **Move** tool to drag it into your other document.
8. Use the **Move** tool to position it.
9. If you have any white around the outside edge **Delete** it.
10. **Rename** the new layer **left eye**.
11. **Hold down ALT**, click and drag for a duplicate Carrot.
12. Name the new layer **right eye**. It was created on top of the left eye, so drag the carrot eye to the proper position.

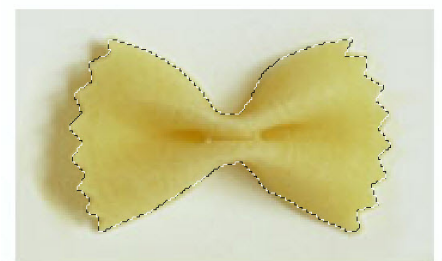

The Blueberry Pupils

1. Go Back to the VeggieManStart.psd
2. **Select** the Blueberry using the Elliptical Marquee Tool.
3. **Copy and Paste into the LastName_VeggieMan.psd document.**
4. Place a **blueberry** for the left eye.
5. Rename it Left Pupil Layer.
6. **Duplicate** the **left pupil layer** and name it **right pupil**.
7. **Move** it to the right eye position.
8. **Ctrl + S** to save.

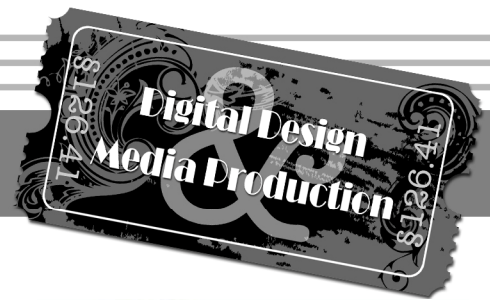

The Bowtie Layer

1. Select the **Polygonal Lasso tool**.
2. Use this tool to **select** the Bowtie Pasta.
3. **Copy** and **paste** to the **LastName_VeggieMan.psd** document.
4. **Rename** the layer to **bowtie**.
5. **Ctrl + S** to Save.

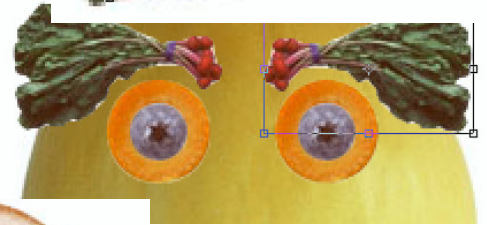

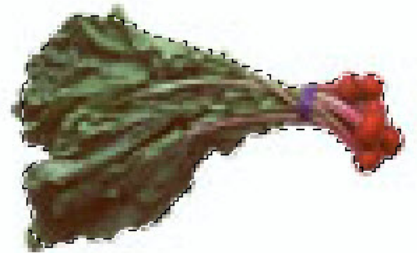

VeggieMan Directions

The Eyebrow Layers

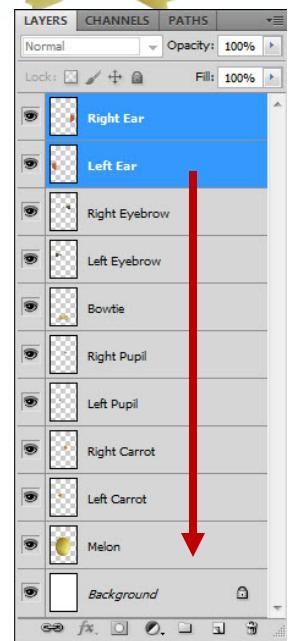

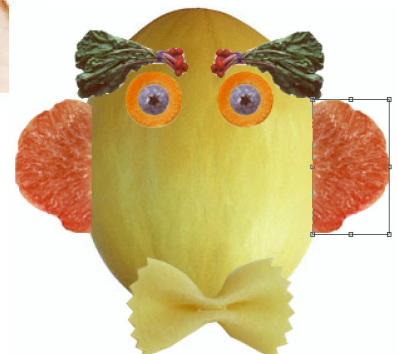

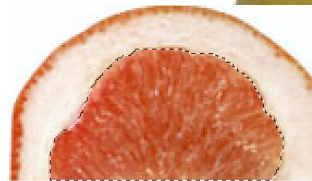

1. The eyebrows will be made of **radishes**.
2. Use the **Magnetic Lasso** tool  to select the radish.
3. Change the options to this:

Width: 50 px Contrast: 20% Frequency: 10
4. **Copy and Paste** into your Veggieman document.
5. **Arrange** the radish over his left eye.
6. **Using Alt and your Move tool, Duplicate** the eyebrow and position it over the right eye.
7. **Flip** the second radish by selecting that radish layer in your layer palette, then go to the dropdown menu **Edit>Transform>Flip Horizontal**.
8. **Arrange** the second radish over the right eye.

Finishing Touches

1. Create the **ears** from the **grapefruit**.
2. Don't get any of the rind – only the meaty part.
3. **Copy and Paste** into your LastName_Veggieman.psd document.
4. **Rotate** it to be on the Left side of the melon.
5. **Duplicate** the layer. (*Get your move tool, hold down ALT and drag off a New ear.*)
6. Move this melon to the Right side of the melon.
7. Go to: **Edit>Transform>Flip Horizontal**.
8. Rename the Layers, Left Ear and Right Ear.
9. They need to go **behind** the melon.
10. To do this, Click on the **melon** layer in the layer palette in your LastName_Veggieman.psd document.
11. Select the **Magic Wand** tool and click on the **white** area around the melon. Press the **delete** key on your keyboard.
12. Move the **left ear** and **right ear layers** **beneath** the **melon** layer in the layer palette by dragging them **UNDER** the melon layer.
13. **CTRL + S** to save.
14. Create the **mouth** from the **kiwi**.
15. Create the **nose** from the **pepper**.
16. Create the **hat** from the **mushroom**. (It needs to go **under** the **melon** layer. It needs to be rotated a bit.)
17. **Add your name**. Select a fun font. Give it a style.
18. **CTRL + S** to save.
19. **You are going to turn in a JPEG version so...**
Save your project as LastName_VeggieMan.jpg.

Turn IN!!!
